WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Flat bar 20 x 5, standing on edge (20 tall). Cut: two sides 916 (east and west), two ends 1,006 (north and south, fit between the sides), one centre bar 906 (north to south, between the ends), two cross halves 500.5 (between the centre bar and each side).

Outside size 1,016 x 916. All tops flush.

Join every corner and tee with an angle bracket inside it: 20 x 20 x 2 angle, 18 long, 16 in all, two 3.2 mm rivets in each leg.

Rivet the baffle sheet on top afterwards (DWD-DWG-108).

Fit: the east and west bars rest on the wall ledges, 2 mm from the walls all round; the deck lifts out with the drip screens under it.

Check: flat within 1 mm on a bench; diagonals equal within 2 mm.
