WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 1,016 x 916 x 1 mm, the same outside size as the deck frame.
Cut four openings 474 x 414, one under each tray bed: their edges
15 and 489 east and west of the centre line, 15 and 429 north and
south of the centre line. Drill 10 mm in the corners, cut between
with a jigsaw and file straight.
Rivet to the deck frame along the bar centre lines at 150 pitch;
no rivet falls where a tray lip sits.
Stick EPDM gasket tape round each opening (on top), 8 wide, and an
EPDM lip seal round the outside edge to close the 2 mm wall gap.
The trays sit on the gasket; the night air can only pass down
through the beds.
Check: each tray lip covers the gasket all round.
