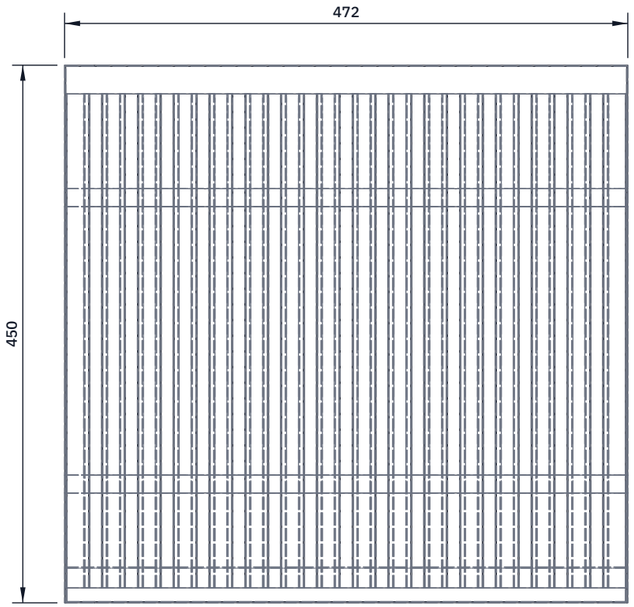
REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-10-01	AC



TOP VIEW

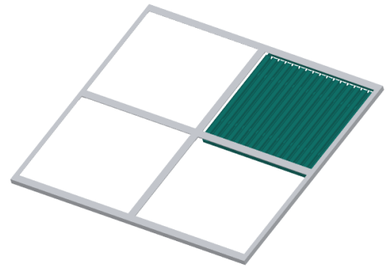
Scale 1:5; looking down (along -Z)

FRONT VIEW

Scale 1:5; looking at the front (along +Y)

RIGHT VIEW

Scale 1:5; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Drawn: the north-east screen. Upslope is toward the top of the top view.
Channels: 31 per screen, 414 long, bent from 0.5 mm flashing to a
U 20 wide and 6 deep. Upper layer 16 at 30 pitch; lower layer 15,
offset half a pitch and 12 lower, so no line of sight.
Frame: two side plates 1 mm, 449.5 x 24; four cross straps 15 x 2
flat bar, 472 long, 120 each side of the screen centre (upper pair
on the side plate tops, lower pair 12 lower); ends bent and riveted.
Sump at the low end: 470 x 30 x 12 deep, folded 1 mm, corners sealed,
with a 422 x 29 tab up its outer wall. End plate at the high end:
472 x 24 with a 422 x 17 tab. Channels rest on the straps; rivet.
Fit: the two tabs rivet to the faces of the deck bars at each end.
Coat all over with black PTFE at a coating shop (it resists hot
brine). Check: channel ends overhang the sump.
