WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 840 x 60 x 1.5 mm; deburr; round the corners to 3 mm.
It covers the 800 x 40 inlet opening with 20 to spare at each end and 10 above and below.
Stick EPDM foam seal on its inner face, 10 wide, all round.
Hinge: a piano hinge along the top edge, one leaf riveted to the flap, the other screwed into the south wall's top batten.
Latches: two over-centre latches on the bottom edge, 300 each side of centre, bodies screwed into the sill batten below the opening.
The wall leans out at the top, so the flap hangs open by its own weight when unlatched; latched, it is pulled onto its seal.
Check: closed, a strip of paper is gripped all round.
