**FRONT VIEW**

Scale 1:10; looking at the front (along +Y)

**RIGHT VIEW**

Scale 1:10; looking at the right side (along -X)

**WHERE IT GOES**

This part in colour, its neighbours in grey

**HOW TO MAKE IT AND HOW IT FITS**

Cut one 1,161 mm length of 30 x 30 x 3 angle; ends square.
A 9 mm hole 12 from each end on the flat leg's centre line:
1,137 between centres.
Fit: on the outer face of the south legs' outward legs, above the
south cross member, from the west leg (275 above the ground) up
to the east leg (470 above the ground), at 10 degrees; the
other leg stands out at its lower edge. One M8 bolt each end.
It stops the stand racking sideways. The north end needs none: the
box, bolted to both rails, ties the two side frames together.
Check: the drain tube passes above it with room to spare.
