WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Foot plate 120 x 120 x 5 mm, corners rounded. One 9 mm hole 17 from the plate centre toward the box side, countersunk from below so the bolt head sits flush and the plate lies flat on the ground.

Cleat: 22 mm length of 30 x 30 x 3 angle. 9 mm holes: upright leg 17 above its lower face; lying leg 17 from the corner; both centred.

Fit: the cleat's lying leg bolts to the plate with a countersunk M8 bolt from below; its upright leg sits inside the leg's face leg and bolts to it, 17 above the plate.

Paint or galvanize the plate after drilling.

Check: the leg stands square on the plate.
